

Product Upgrade: Implementation of Grille Design for PMS Series & PMR-XXV1K5W

To enhance product safety and reliability, Delta's PMS Series and PMR-XXV1K5W Series panel mount power supplies will be upgraded to models equipped with a grille.

Purpose and Benefits of the Upgrade

The newly added grille design provides multiple layers of protection and performance improvements:

- **Comprehensive Protection:** Prevents screws or large foreign objects from entering the unit, avoiding damage or performance loss. With coating, provides enhanced overall protection.
- **Electromagnetic Shielding:** The metal mesh helps minimize and prevent electromagnetic interference (EMI), ensuring stable operation of sensitive electronic components.
- **Operational Stability:** Improves heat dissipation and noise reduction, contributing to extended product lifespan.

This upgrade takes effect immediately. For more details, please reach out to us through the [Contact Us Form](#).

Implementation Date: Dec-2025

Change Details:

Series	Model	Old - without Grille	New - with Grille
PMS	750W	REV 02	REV 03
		 	 

Series	Model	Old - without Grille	New - with Grille
PMS	1K2W	REV 02  	REV 03  
PMR	1K5W	REV 01  	REV 02
