Delta Panel Mount Power Supplies for LED Signage

Delta Electronics offers different types of highly reliable panel mount power supplies for a wide variety of LED signage applications. The PMR and PMF series feature high MTBF and corrosion resistant aluminium body. The PMF series comes with built-in active PFC and remote ON/OFF function suitable for centralized control system. Whereas the PMR series is suitable for installation within 1U rack height. For system that requires basic functionality but equally reliable power supplies, the highly affordable PMT series provides not only overvoltage and overcurrent protections but also other excellent specifications bigger than its price tag. All series come with two different connector options (Terminal Block and Front Face).

The panel mount power supply series for LED signage are:
